## POSITION DESCRIPTION

**WANTED: Polish developers looking to take their programming career to Holland!**

### POSITION TITLE: PLC Software Engineer

**CONTRACT TYPE:** 12 months full-time, with a view to extension

**LOCATION:** 50% home office (anywhere in Europe) and 50% in Oosterwolde, The Netherlands. This position offers the opportunity to live in Oosterwolde for at least 2 weeks of each month, in order to be available for on-site visits.

**SALARY:** Negotiable

#### DESCRIPTION:

For a project based in Oosterwolde, we are seeking to recruit a talented individual to join an existing team of programmers. This team tests, develops and deploys custom software solutions for old and new manufacturing machines, processing machines, assembly machines, process installations and robot systems. These systems are based on custom made software for PC, PLC, SCADA, and DCS systems. Depending on the chosen system, candidates need to be familiar with one or more of the PLC languages described in the IEC61131-3; LD (Ladder Diagram), FBD (Functional Block Diagram), ST (Structured Text), IL (Instruction List) and SFC (Sequential Function Chart). Also experience with Microsoft Visual Studio.Net environment like, C#, VB and C is an advantage.

#### RESPONSIBILITIES:

- Developing industrial-related software programs
- Commissioning and testing automated control systems
- Creating functional and test documentation
- Maintaining contact with project stakeholders

#### REQUIRED EXPERIENCE:

##### Essential:

- Minimum of 3 years relevant experience in PLC Programming and industrial commissioning
- PLC programming experience with the Siemens TIA Portal and/or Beckhoff
- Designing, developing, programming and testing PLC systems
- Qualified in Electrical/Electronic Engineering or experience in system software engineering
- Relevant industrial domain know-how
- Driving licence
- Willingness to travel and live in the Netherlands for extended periods of time
- Fluency in English

### **Desirable:**

- Previous experience working with electrical control panels
- Experience with SCADA development and HMI programming
- Familiar with other PLC brand programming knowledge

### **WHAT WE OFFER:**

- Attractive compensation and benefits package
- Interesting and challenging work for prestigious clients
- Opportunities to develop your skills and gain valuable practical experience overseas

## **ABOUT NEOCODIS**

Neocodis is a German-based software house offering customized web solutions to customers across the globe since 2008. With operations right across Europe, we manage projects with an extensive network of programmers from Europe's IT powerhouse countries – Poland, Ukraine and Belarus. We provide easy access to low-cost, high-tech IT skills whilst setting the industry standard for accuracy, quality and timely delivery of results.

Our company vision is to become the employer of choice for IT professionals across Eastern Europe. As you will see from the list of perks below, we are well on the way to achieving our strategic vision!

- ✓ Attractive remuneration and extra benefits
- ✓ Extensive options for professional training and career advancement opportunities to keep you at the cutting edge of the industry
- ✓ Freedom to pursue your own initiatives within the company that add value, solve challenges and put you in charge of your workload
- ✓ We practice Holacracy, which means that authority is truly distributed across the company and decisions are made locally by the individual closest to the front line
